

Elmos: Leading-edge technology from Dortmund

Dortmund, August 22, 2023: Elmos, a leading manufacturer of automotive mixed-signal semiconductors, is one of the pioneers and a figurehead for the profound structural change in Dortmund and the entire Ruhr region. Thanks to its targeted focus on future-oriented industries such as microelectronics, nanotechnologies or IT, Dortmund is a rapidly growing technology and start-up center. It has established itself as an important science location on a national and international level. A dynamic eco-system of companies, universities, colleges and research institutes is driving forward-looking innovations through joint cooperations.

The Ruhr area, once synonymous with coal and steel, is now characterized by high-tech and a spirit of innovation, thanks to technology companies such as Elmos. As one of the first companies in the Technologiepark Dortmund, Elmos has developed into a world market leader for automotive mixed-signal semiconductor solutions since its foundation in 1984. Highly specialized teams develop, design, and produce the integrated circuits for innovative products of tomorrow's mobility. As one of the exemplary companies in the region, Elmos benefits from the broad network and the close partnership between business, science, and research.

In this context, the Wirtschaftsförderung Dortmund (Economic Development Agency) presents the new image film "Spitzentechnologie aus Dortmund" (Leading-edge technology from Dortmund, in German only). Dr. Roland Krumm, Head of Governmental Relations & Research Funding at Elmos, underlines the innovative strength of the company as well as the long and deep connection between Elmos and the business location Dortmund. The image film is available on the YouTube channel of Wirtschaftsförderung Dortmund under the following link: <https://www.youtube.com/watch?v=dOykMdFWTAw>

About Elmos

Elmos develops, produces and markets semiconductors, primarily for use in the automotive industry. Our components communicate, measure, regulate and control safety, comfort, powertrain and network functions. For 40 years, Elmos innovations have been bringing new functions to life and making mobility worldwide safer, more comfortable and more energy efficient. With our solutions we are already the worldwide #1 in applications with great future potential, such as ultrasonic distance measurement, ambient and rear light as well as intuitive HMI.
