

Elmos opens new development site in Brno, Czechia, and strengthens global R&D network for innovative future projects

Leverkusen, December 10, 2025: Elmos Semiconductor SE (FSE: ELG) is consistently advancing its development roadmap and strengthening its international R&D presence with a strategic key location. On November 1, the company opened a new R&D center in Brno, Czechia, one of Eastern Europe's leading high-tech hubs. With the new location, Elmos is specifically expanding its development capacities and creating additional innovative strength for the next generation of highly integrated mixed-signal solutions.

The new R&D team in Brno brings comprehensive expertise in product architecture, analog mixed-signal and digital design, and test engineering – important skills that are central to the next generations of Elmos product families.

"Our new R&D center is more than just another pin on the map. It is an expression of our commitment to future growth with innovative solutions in the automotive and non-automotive sectors. With our R&D teams in Europe and Asia, we have a powerful, globally positioned development network that consistently drives innovation and competitiveness. This enables us to secure sustainable growth in our established markets and expand our potential in future technology fields," says Dr. Jan Dienstuhl, Chief Development and Sales Officer at Elmos Semiconductor SE.

About Elmos

Elmos has been developing intelligent microchip solutions for over 40 years, primarily for the automotive industry. As a fabless company and specialist for analog mixed-signal ICs, Elmos makes the mobility of the future safer, more comfortable and more efficient. The innovative products of Elmos enable reliable driver assistance systems, intelligent sensors, efficient motors and new LED lighting concepts in modern vehicles. As a market leader in cutting-edge applications, Elmos is powering global megatrends such as autonomous driving, electromobility and software-defined vehicles.

Note

This release contains forward-looking statements that are based on assumptions and estimates made by the Elmos management. Even though we assume the underlying expectations of the forward-looking statements to be realistic, we cannot guarantee the expectations will prove right. The assumptions may carry risks and uncertainties, and as a result actual events may differ materially from the forward-looking statements. Among the factors that could cause such differences are changes in general economic and business conditions, fluctuations of exchange rates and interest rates, the introduction of competing products, lack of acceptance of new products, and changes in business strategy. Elmos neither intends nor assumes any obligation to update its statements with respect to future events.
