

Elmos Semiconductor SE ESG KPIs

Section: Governance
Chapter: Research and Development
Policy: Innovative strength
Coverage: Elmos Group
Supported UN SDGs:

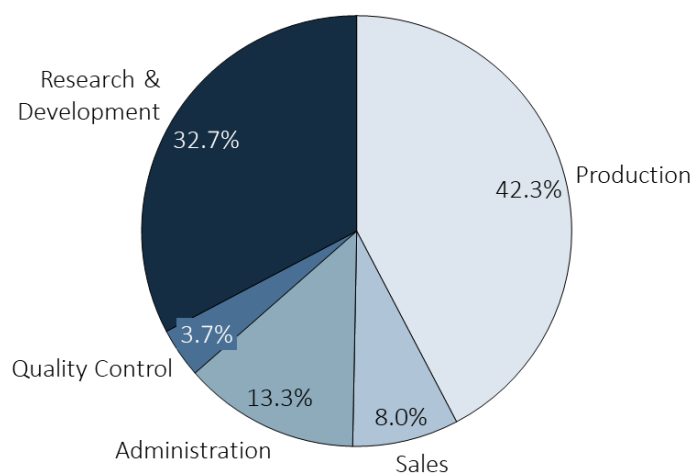

Addressed GRI standards: 2-6

Employees in research and development, annual average

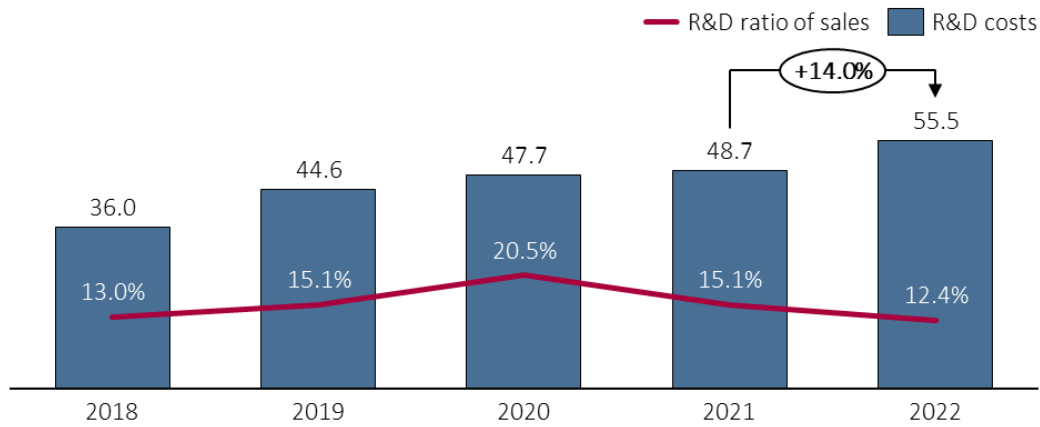

Employees by area, annual average 2022

More than 30% of our employees work in research and development. The high proportion of R&D employees represents the pursuit of innovation and technological progress.

Research and development expenses (in million Euro)

Elmos invests significantly more than 10% of sales in research and development.

Although research and development expenses climbed by 6.8 million year on year to 55.5 million Euro, or 12.4% of sales, the increase was lower than the very high sales growth. Research and development expenses remained at a high level overall, enabling us to develop innovative solutions for our customers in all our application areas.
