

Motor Control

elmos[®]

EXPERTS FOR AUTOMOTIVE ICs

We have a broad expertise in analog mixed-signal integrated circuit design.

We deeply understand our customers application needs to create real system innovation.

We are a global player for automotive ASSPs and ASICs. We offer worldwide sales and application support.

elmos[®]

CORPORATE KEY FACTS

6 Elmos ICs

on average in every new car

6 product segments

Motor Control, Lighting, Safety/Power/Custom ICs,
Ranging, Optical, Sensor ICs

16 locations worldwide

incl. 7 R&D centers, HQ located in Dortmund, Germany

35+ years of experience

in analog mixed signal IC solutions

~1,150 employees

thereof 350+ product developers & engineers

WE ARE LOCATED ALL OVER THE WORLD

PRODUCT SEGMENTS

- RANGING
- OPTICAL
- SENSOR ICs
- MOTOR CONTROL
- LIGHTING
- SAFETY, POWER & CUSTOM ICs

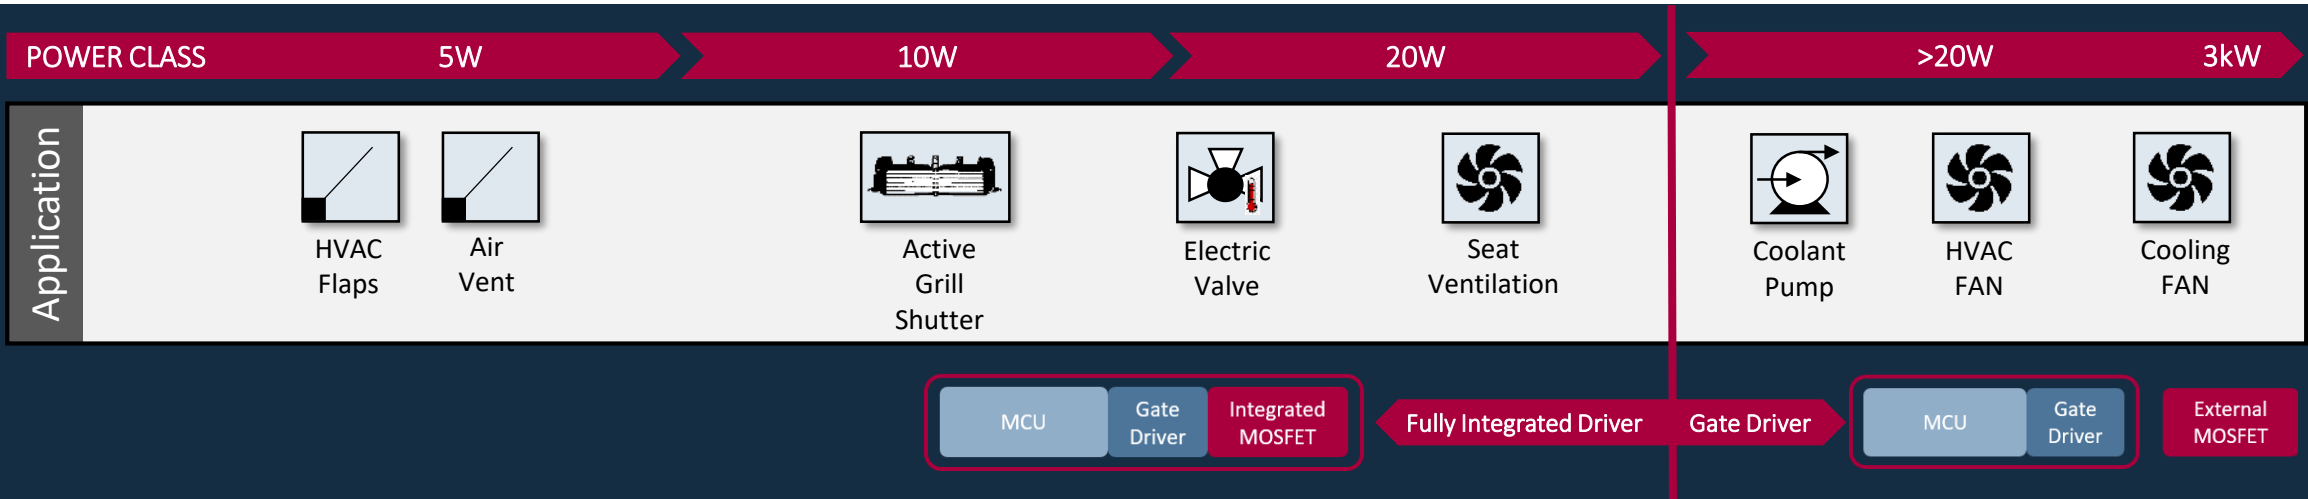

HIGHLY INTEGRATED MOTOR CONTROL ICs: BEST PERFORMANCE AND LOW SYSTEM COST

- Broad product portfolio for DC, Stepper and BLDC motors
 - Unique BLDC motor control family for 12V, 24V and 48V board net architecture for typical 5W up to 3000W motors
 - Advanced motor control algorithms for sensor-less drives
- Innovative ICs for motor driven HVAC systems
 - #1 for smart HVAC actuators
 - 500+ million ICs delivered
 - Benchmark for low noise and high efficiency

MOTOR CONTROL FOR THERMAL MANAGEMENT

- Elmos provides high integrated motor control solution for all kind of Thermal Management applications:
 - High Power BLDC Drivers/Controllers for Pumps, Fans and HVAC Blowers
 - Small/Medium Power Integrated Drivers for HVAC Flaps, Grille Shutters, Valves, Seat Ventilation and Small Pumps
- Supporting power range from 1W to ~3kW

HIGH PERFORMANCE BLDC DRIVERS/CONTROLLERS FOR ROTARY DRIVE

elmos[®]

Key Differentiators

- Unique BLDC motor control family for 12V, 24V and 48V board net architecture
- Optimized Motor Control architecture for silent and efficient sensor-less motor algorithm
- Low total system cost of ownership for sensor-less single shunt solution

Where we are successful

- Thermal management applications:
HVAC Fan, ECF, Water Pumps, other
- In production at OEMs:
Daimler, VW, Audi, GM, Renault, JLR, FCA, other

E523.06/52

High Performance BLDC Controller

Key features

- Modular concept to support 12/48V applications with same architecture (E523.06 – 12V; E523.52 – 48V)
- Fully integrated and optimized peripherals for sensor less FOC operation (fast Op-Amp; PWM/ADC accelerators)
- Embedded 16bit MCU with Hybrid Memory Concept: 32kB Flash + 24/16kB ROM (including LIN stack)
- Dedicated SW knowhow and support from Elmos and proven partners

elmos[®]

Gate Drivers + MCU

MOSFET

AVAILABLE!

E523.01/50

Smart BLDC Driver

Key features

- Push-pull gate driver for B6-NMOS Bridge

- Modular concept to support 12/48V applications
E523.01 – 12V
E523.50 – 48V

- Fast current sense amplifier
- Integrated BEMF Interface
- Programmable dead time

Gate Drivers

AVAILABLE!

E533.06

Next Generation BLDC Controller

Key features

- High performance ARM Cortex M4 @40MHz with 96kB Flash and no memory wait states
- Optimized measurement unit with fast Op-Amp, and ADC & PMW HW accelerators
- Developed according FUSA: ISO 26262 compliance
- Optional software frame work **MotCoS** including a high efficient motor control algorithm and a standardized application interface
- E533.06 enables best in class system efficiency, acoustic performance and cost of ownership for embedded sensor-less single shunt solution

Gate Drivers + MCU

IN DEVELOPMENT

INTEGRATED DRIVERS FOR ACTUATOR DRIVE

Key Differentiators

- Deep understanding of architecture and system requirements for smart actuator
- Highest integration level for optimized system cost
- LIN auto-addressing
- High performance & silent motor control

Where we are successful

- High market share for Smart LIN actuator control
- #1 for smart LIN HVAC flaps actuator control
- In production with Active Grill shutter and Electrical Water Valves at major OEMs

E523.42

Integrated Controller for 3 phase BLDC

Key features

- Internal current/voltage/temperature sensing (no shunt needed)
- High resolution & fast ADC for precise measurement
- PWM generator can trigger core independent configurable measurements
- Supports sensor-less FOC operation
- Embedded ARM Cortex M0 core with 32kB OTP Program Memory and 24kB ROM
- Flexible GPIO and power supply block
- E523.42 provides the most complete set of internal functions for motor control

Integrated Drivers

MOSFET

AVAILABLE!

E523.39

Smart SPI Stepper Driver

Key features

- Optimized for:
 - very silent motor run
 - low number of external components
- Fully integrated Stall Detection function with complete post processing
- Unique Fail Current Detection which detects changing motor parameters before the motor stops working.
- E523.39 enables the implementation of innovating feature such as adaptive holding torque with programmable brake force or adaptive run currents.

MOSFET

AVAILABLE!

E523.71

New Smart LIN Driver for Brushed DC actuators

Key features

- Integrates all needed components to support a Smart LIN Brushed DC Actuator
- Enables optimized PCB size by small package SO8
- Supports up to 700mA output current and smooth speed control by PWM.
- Analog input for sensor based position detection
- Includes integrated motor control and standard actuator application firmware
- E523.71 enables lowest total system cost of ownership due to full integration and reduced need for external components.

MCU

Gate
Driver

External
MOSFET

IN DEVELOPMENT

E523.62/63/64

Next Generation Universal Smart LIN Motor Controller

Key features

- Family concept to support large power range (400mA, 1000mA, 2000mA)
- Continuous 3phase sensing by integrated current mirrors
- LIN 2.x compliant to SAE J 2602, ISO17987 incl. LIN AA+
- Optional software frame work **MotCoS** including a high efficient motor control algorithm and a standardized application interface
- E523.62/63/64 enables lowest total system cost of ownership for Smart actuators driven by Brushed DC, Bipolar Stepper Motors or BLDC motors.
